(root@kali)-[/mnt/sda3/etc]
#
```

Tenho 3 contas nessa ISO do ubuntu, a conta ‘gustavo’ tem uma senha aleatória pessoal (só para testes), as outras duas: usuario1 e usuario2, ambas têm a mesma senha: ‘1020’ (sem aspas).

Entretanto, eu tinha colocado essa senha “1020” para teste em Windows 7 e Windows XP, e a aplicação John quebrou instantaneamente. Só que aqui, (creio que seja pelo usuario “Gustavo”), ele não quebrou instantaneamente. Ficou muito tempo e não quebrou nenhuma das senhas.

Creio que ele tentou quebrar primeiramente essa conta chamada ‘Gustavo’. Entretanto, sem sucesso.

Ou ele simplesmente não conseguiu quebrar, pelas hash’s do Ubuntu serem mais protetivas.

```
